### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: None of the prior art references of record, singly or combined, teaches or suggests silica particles having the particular relationship between specific surface area and fractal structure value as claimed. As shown in the Examples and comparative examples in the instant specification, conventional silica particles do not possess such particular relationship as claimed (See Table 2). The most pertinent reference is the Mangold patent (US 6,063,354). Mangold discloses fractal dimension; however, Mangold does not report two fractal dimensions at two different particle size ranges (or corresponding specific surface areas) as required in the instant claims. In addition, the silica particles as taught by Mangold function as polishing agents; therefore, it would not have been obvious to treat such silica particles with surface agents as described in claim 4, incorporated the silica particles as fillers in resin as required in claim 5, or function as toner additive as recited in claims 6 and 7.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to H. T. Le whose telephone number is 571-272-1511. The examiner can normally be reached on 9:30 a.m. to 6:00 p.m., Mondays to Fridays.
